Auditing Exams

International Legal + Financial Bookstore

The IIA has streamlined the CIA exam by redefining the three exam parts according to The IIA's global job-analysis study. Each part will better test the knowledge and skills required of current internal auditors. **Now, content is more evenly** distributed across all three parts and topics in Part 3 no longer overlap with those in Parts 1 and 2. This redistribution has made it more important to take Part 3 last, but it is now **more feasible for candidates to take Part 3 either first or last.** Parts 1 and 2 should continue to be taken in numerical order because topics tested in Part 2 still build on those found in Part 1. Part 3 still requires a basic knowledge of topics that relate peripherally – but not directly – to auditing. However, now Part 3 has an increased focus on IT-related topics and how they pertain to auditing.

Since the 2021 edition it is possible to do the exam in the German language. However, no textbooks will be published in German, only the examination is offered in your mother tongue.

The format of the test will stay the same. You will still be asked the same number of questions and given the same amount of time to finish each part of the exam. The fees and requirements to take the CIA exam will also remain the same. For the Premium Package you have the possibility for a 2nd Exam Rehearsal in full length practice exam. Notice: Web access is limited to one email address.

Part 1: Essentials of Internal Auditing

Decisive changes:

- Includes Governance, which is now a main focus
- Greater alignment with The IIA's Attribute Standards
- Cognitive levels: 14 basic topics, 16 proficient topics

Part 2: Practice of Internal Auditing

Decisive changes:

- No longer test on fraud risk (although risk is still an element of Part 2)
- Goes deeper into the Information Gathering process under Part 2 Performing the Engagement
- Cognitive levels: 14 basic topics, 21 proficient topics

Part 3: Business Knowledge for Internal Auditing

Decisive changes:

- Fewer topics
- No longer tests on Governance or Ethics
- Now tests on Data Analytics
- Cognitive levels: 32 basic topics, 3 proficient topics
- Goes much deeper into Information Technology and Information Security
